**FAMOUS FOR HARDWARE** since 1903  
*Available at selected branches*

## DOOR CARE

Timber is a natural product that responds to temperature and moisture variations. Proper treatment of wooden doors is essential in our harsh climate.

### IT IS VERY IMPORTANT TO CHOOSE THE RIGHT DOOR

#### DOOR CATEGORIES

##### LIGHT DUTY

Domestic use

##### MEDIUM DUTY

Domestic / Commercial / Industrial use

##### HEAVY DUTY

High traffic / Security use

##### CLASS 1 EXTERIOR

May be (directly) exposed to weather - once properly sealed

##### CLASS 2 SEMI EXTERIOR

Not to be exposed to sun or rain

##### CLASS 4 DRY INTERIOR

Dry controlled conditions

##### FIRE DOOR

Deemed to be 30 minutes fire resistant

#### TREATMENT: PRIOR TO HANGING

Once the door has been trimmed to fit the door frame, treat thoroughly before hanging. Doors have six sides - the top and bottom are the most important, where moisture movement is highest. Treat with a suitable preservative – undercoat, PVA, enamel, oil based sealant or varnish – get advice if unsure.

#### STORAGE: PRIOR TO HANGING

Store flat in a dry area, out of direct sunlight, raised to avoid moisture transfer from cold, moist concrete floors. Support the doors along the full length to avoid warping.

#### GUARANTEES

Manufacturers limit their guarantees to the value of the door. Some manufacture to SABS standards and some don't. Incorrect treatment before, during or after installation; incorrect choice of door; and physical damage after collection can render the guarantee null and void.\*

#### DOOR PANELS

Door panels must be free to expand and contract in the door framework as moisture levels change throughout the year. When painting or varnishing, the panels should be able to move freely – make sure they do not adhere to the framework of the door.

#### TRIMMING

Trimming to fit the frame is usually necessary – trim evenly on the top, bottom and on both vertical sides. At most 10mm maximum trim, limited to 5mm per side. Be careful to allow for lock installation.

##### *\*Defective Door Claims:*

Any claim for defective doors is limited to the value of the door and subject to proof that correct procedures have been followed concerning storage, treatment and hanging.
